1 MSE Guidelines for Students

The document serves as a reference for questions that regularly arise. It is revised on an ongoing basis. If you can't find the information you are looking for, please contact us at mse@bfh.ch

MSE-Office	All communication regarding the core modules must be channelled exclusively through our MSE Office. MSE students are welcome to contact us with any queries they may have. However, we would appreciate it if you could read the MSE Guidelines and refer to them should you have any questions.

2 Dates & Deadlines

Study Start	Week 38: Autumn semester "AUT" Week 08: Spring semester "SPR" AY26-27_dates_MSE_Reg-D_V1 (2).pdf
Calendar	BFH: Rahmenkalender MSE-CH: Moodle MSE: Dates Academic Year Moodle MSE
Timetable	Central Modules: Moodle MSE: Timetables all regions Moodle MSE (msengineering.ch) EVA: Timetable and module description Home Moodle MSE Leave of absence (SPR Art. 32a) & exarticulation
Change of semester	Leave of absence and exarticulation apply to the beginning of a semester. Templates are available on BFH-Moodle. 31. July (deadline end of March)

- 31. January (deadline end of September)

The BFH account with a bfh-email for the fall semester is generated and sent out at the beginning of July at the earliest, and for the spring semester at the beginning of December at the earliest. Unfortunately, it is not possible to access the MSE and BFH Moodle sites using the personal email address linked to your [Switch edu-ID](#).

New Students

- Please read the MSE Guidelines to familiarize yourself with the MSE processes
- Once you have a BFH email, you must register with your [Switch edu-ID](#)
- As soon as you have got a BFH-mail, we will send all emails to your **BFH student email address**. You are therefore required to check this inbox regularly while registrations and exam phases daily.
- Please make a note of the important MSE deadlines or check them regularly on [BFH Moodle](#).
- The MSE Guidelines can be consulted in case of uncertainty.

Begin of semester

Ultimately, students are responsible for correctly registering for modules each semester. This means that the modules are correctly registered and later recorded in IS-A.

For technical reasons, registrations are accepted:

Registration period opens

- Autumn semester (AUT): from 15 April at the earliest
- Spring semester (SPR): from 15 October at the earliest

Exception for central modules: At the beginning of the autumn semester, during the first registration phases, it is also possible to register central modules offered in the spring semester. However, these registrations will only be entered in IS-A after 15 April.

Module registration per semester

All MSE modules (central modules, EVAs, project work, and the master's thesis (MTh) must be recorded in IS-A in the semester in which they are taken. Exception: If the master's thesis (MTh) spans two semesters, it is entered in IS-A only once. Please register your modules as early as possible. If feasible, we recommend discussing your study plan with your advisor in advance.

Core Modules

For **central modules**, different registration phases (Region D) are defined for each semester. Therefore, BFH must inform MSE-CH of the registrations before the respective deadlines of each registration phase. After the completion of each phase, we receive confirmation indicating whether the registrations have been accepted. If a registration is not confirmed, students can submit a new registration, either for the same module or for a different one. Please note that the number of available places is limited, and places are allocated based on priority levels I, II, and III.

- We do not enter core modules into IS-A until the module registrations have been confirmed by the relevant regions.

Further information is available on BFH-Moodle.

[Kurs: MSE BFH-TI Students | BFH Moodle – Die Lernplattform der Berner Fachhochschule](#)

MSE-CH recommendation

Central modules: Last registrations or re-registration phase in the semester: Students who are only admitted to the MSE shortly before the last registration phase can register for **central modules** in the last registration phase with the risk that they will only find out approx. 4 weeks after the start of the semester whether they can complete the module with the examination. Students can enquire in advance via mse@bfh.ch whether there are still places available in the desired modules. However, even if there are no more places available,

the module can still be registered for and attended, as there are always cancellations of modules in the final registration phase and students can take over a place. If the module has been attended but the examination cannot be taken, this may be advantageous for the next module enrolment or examination in the following semester. Tip: If students still have free capacity in a semester, there is still the option of enrolling for an EVA. Please observe the enrolment deadlines. (In case of any uncertainties, reference should be made to the relevant guidelines.)

As a rule, students discuss the **EVA modules** they wish to attend with their adviser. If the adviser agrees, students register for the EVA as described below within the deadlines.

BFH EVAs: We ask students to register as early as possible, i.e. as soon as the semester registration period begins, as this enables us to determine whether a module can be offered or not. The EVA short code is required to enter the module into IS-A. You can find the short code on [MSE-Moodle](#), where you will also find the email containing the registration details.

EVAs

External EVAs and Summer School are only reported to us by students once the external lecturer has confirmed that the module is taking place. This means that students must first register at the relevant university of applied sciences where the desired EVA is taking place. The student is responsible for ensuring that the module has been recorded by the MSE office in IS-A by calendar week 40 (AUT) or 10 (SPR) at the latest. Modules taking place between two semesters are recorded in the semester in which we receive the mark.

PAs and the MTh are MSE modules which must be completed within a study semester. Module registration must be submitted *by email* as early as possible. If a student is taking the MTh module over two semesters, please note that we can only enter them once in IS-A. This means that in this case there can be no module entry for the final semester.

Projects & MTh

The proposal for project work and the MTh must be submitted *by email* at latest:

- By week 10 for the spring semester
- By week 40 for the autumn semester

If it is not possible to submit the proposal within the deadlines mentioned above, please inform us *by email*.

Registration period is closed

The students must ensure that all module registrations (central modules, EVAs, Projects works and MTh) are correctly entered in IS-A in calendar weeks 10 (SPR) and 40 (AUT).

Examination

Schedule [Moodle MSE: Dates Academic Year | Moodle MSE](#)

Please meet the following deadlines and inform us by email.

End of semester

- Students submit the project work or the master's Thesis (reports) to their advisor in week 3 or week 31 (until Friday)
- Students must submit the grades for EVAs or Summer Schools of other UAs
- Students need to check their grade/marks in IS-A at the latest: End of August (SPR) or Ende of February (AUT). If any marks are missing, students must inform us by email immediately.

End of the first study semester

The **ISV** is an agreement between students, advisors, the head of profile and the head of the degree program. Students who have been definitively admitted to the MSE program must send the completed ISV to the MSE office as a Word document at latest of the first semester.

3 International

Welcome	Welcome Center BFH / International study BFH
GEO	Kontakt Global Engagement Office GEO BFH Responsible primarily for exchange students who have been admitted to the relevant school, but who may be experiencing difficulties with the immigration authorities regarding entry, or who require assistance in proving that they have sufficient financial resources.
Apartments	https://www.bfh.ch/ahb/de/studium/wohnungsangebote/ Mind the high cost of living in Switzerland and the restricted possibilities for employment:
Costs	• Increase in tuition fees: FAQ BFH • Sem.admin • Eda.admin • https://www.studyinswitzerland.plus/ • https://www.studyinswitzerland.plus/cost-of-living/ • https://www.studyinswitzerland.plus/visas-permits/ Attendance of MSE modules requires travel by train within Switzerland. BFH will not cover any travel expenses. Student Personal Data Form BFH Once you have been admitted to the degree programme, all students – including those from abroad – must complete this form by the deadlines. Please read the emails from the Student Administration carefully. Failure to do so will result in a reminder fee being charged.
Important	
Erasmus & Double Degree	More specific information can be found in chapter 4.
Problems with entry?	Sometimes, students are admitted to the program but are unable to arrive at the start of the semester. Unfortunately, we cannot assist you with entry permits, as this is the responsibility of the relevant authorities. However, it is helpful if you contact GEO, geo@bfh.ch early on if you encounter any problems. (If necessary, we can send a BFH form. This is for persons from outside of EU/EFTA who are unable to open an account in Switzerland.) If you cannot start the semester, please inform mse@bfh.ch by weeks 10 (SPR) and 40 (AUT) at the latest.
Problems paying tuition	Please contact the Student Administration Office, studadmin@bfh.ch . They will look into the matter and, if necessary, arrange for the reminders to be stopped.

4 MSE Organization at BFH

The eight Universities of Applied Sciences in Switzerland are offering the practically oriented MSE master's program. In this course of study, students can benefit from a diverse range of courses structured in 16 profiles, which offer great scope for personal choice and have a network of specialists and students across Switzerland. BFH offers 11 profiles: Business engineering (BE), Civil Engineering (CE), Computer Science (CS), Data Science (DS), Electrical Engineering (ELE), Energy & Environment (EnEn), Information & Cyber Security (ICS), Mechatronics & Automation (MA), Mechanical Engineering (ME), Medical Engineering (Med), Photonics & Laser Engineering (Pho).

	The BFH student card must be updated for each semester, this is particularly important for examinations. Information can be found here: BFHcard BFH BFH IT / IT-Support Military Service Zentrale Studierendenadministration BFH / Central Student Administration BFH
BFH	
Venues	The core modules do not take place at the BFH in Biel/Bienne or Burgdorf, but can be attended in three regions, so travel to these course locations is required. EVAs take place at the eight different universities of applied sciences in Switzerland. Project work usually takes place at the laboratory of the relevant supervisor. For BFH students, this is usually in Biel/Bienne or Burgdorf.
Regulations	See on BFH-Moodle and here: SPR MSE 19.06.2024
Recognition of academic Achievements	Students can register the modules they wish to have validated on the IS-Academia (IS-A) portal. The MSE office will examine them and communicate the decision.
pre-Master	Students who are admitted to the MSc program with conditions are required to sign an agreement. While you are allowed to attend MSE modules (for example, CM modules) in parallel, your main priority must be completing the required BSc modules and/or meeting the other admission conditions. Once the agreement has been signed, we will enroll you in the BSc modules via IS-A. A personal advisor will generally be assigned after you have fulfilled all the conditions listed in your agreement and have been definitively admitted to the MSE program. Until then, please direct any questions either to the person responsible for the module (PCO) or to the MSE Office. Completing the admission requirements within the agreed timeframe is essential to receive the MSE diploma. If the requirements are not fulfilled within this timeframe, your enrolment in the program will be terminated. If you are unable to start your studies in the semester in which you were admitted, please inform the MSE Office as early as possible.
Disadvantage compensation	Students should submit their application at the start of their studies. If their application for disadvantage compensation is approved, students must inform us <i>by email</i> and later their lecturers in good time and provide them with the relevant certificate (Attest). The certificate does not contain any medical details. (Only Region D will be informed regarding official disadvantage compensation.)
Double degree	Students are like regular BFH students, they study and must therefore be familiar with, and comply with, the same MSE processes. Students are responsible for ensuring that they are enrolled on the correct modules each semester. Please read the MSE guidelines and information carefully.
Erasmus	As an Erasmus student, you will generally study with us for one semester. Please decide early on which modules you would like to attend at BFH. Once we have received the signed study agreement from the MSE program director, we will register you for your chosen modules. Changes to module registrations will only be accepted in justified cases and before the deadline, which you can find in the guidelines here. Therefore, please clarify which modules you wish to attend with your school and us in advance. Please check IS-A to see if the registrations are entered correctly within the deadlines. At the end of the semester, you can download your transcript of records from IS-A yourself. Otherwise, email the MSE office and we will send you the TOR by email.

	You will mainly correspond with BFH via this email address before you are accepted: international.ti@bfh.ch. Once enrolment has been confirmed, correspondence will mainly be with mse@bfh.ch and, if necessary, international.ti@bfh.ch will be copied in.
Study confirmation	Students can download a study confirmation directly from IS-A.
ISV	The ISV is an agreement between students, advisors, the head of profile and the head of the degree program. The document lists the agreed compulsory modules to be attended, the requirements for starting the master thesis (MTh) and the deadlines for submission. Students who have been definitively admitted to the MSE program should send the completed ISV to the MSE office as a Word document. We will then have the agreement signed using Switch Sign. Deadline: by the end of first semester.
Student projects for companies	The BFH offers companies the opportunity to have interesting questions addressed by MSE students as part of a project or master's thesis. This agreement regulates the costs and the rights and obligations of the parties in the context of such a project or master's thesis. If students are interested, they can contact their advisor or the MSE office by email.
Attendance continuity	In each semester, one module must be attended, and proof of competence must be provided. If this is not possible, an application for leave of absence must be submitted within the deadlines.
Semester abroad	If students from Switzerland wish to spend a semester abroad, they should contact the International Office at TI or AHB. Studium und Praktikum im Ausland BFH
Compulsory modules	The compulsory modules consist of three modules (2 TSM- and 1 FTP-modules) that are recommended by the chosen profile, priority I. The selected compulsory modules can be attempted twice; they must be passed by the second attempt. Otherwise, deregistration will result.
Other modules	Failing a non-compulsory module on your first or second attempt is not a problem. However, please note that the failing grade will appear on your transcript of records (ToR).
IS-A	IS-Academia (IS-A) is our ERP for students. Students have access as soon as they have received a BFH email address. Students can use this portal to view their module registrations, grades and documents such as study confirmations, ISV or learning agreements independently. Transcripts of records are updated at least twice a year. <u>Central modules registration</u>: There is a delay between students' enrolments and the entries being made in IS-A, as we first await confirmation from MSE-CH before making the entries in IS-A. Before a new registration or withdrawal is submitted in a different registration phase, the entries in IS-A must first be checked.
ToR	If modules are insufficient, these will also be listed in the diploma ToR, unless the modules are successfully repeated or were deregistered by the deadline (see chapter deadlines). All modules can be repeated twice. The compulsory modules must be successfully completed after the second attempt. .
Study Extension	If the MSE program cannot be completed within the maximum number of semesters according to study regulations from the time of definitive admission, an application for an extension must be submitted.
NDA	If a project or master's thesis is confidential, this must be indicated on the proposal and the report with the note 'NDA'. The retention period may also be noted on the title page of the report.

Book	The diploma students are invited via book tool to enter the book abstract by the end of week 4 or week 26. (More details are available on BFH Moodle.)
Video	We request that you record a short presentation of your MTh and upload the MP4 file to BFH's Next Cloud. The link will be sent by the MSE office. This video is mandatory and will be published alongside the book abstract. It should be between one and three minutes long, and provide information about the idea, content and results of the MTh. It may be used for awarding prizes, for example. Therefore, present your video in the best possible light.

5 Curriculum and MSE modules

Framework of the MSE	- In full-time studies, 30 ECTS per semester is usually the maximum 1 ECTS corresponds to 30 working hours, 90 ECTS credits corresponds to a total of 2700 working hours Theoriemodule - MSEngineering The Master of Science in Engineering (MSE) may be completed on either a full-time or part-time basis. The full-time programme is typically completed within three semesters. The part-time programme generally extends over six semesters and is designed to accommodate students who wish to combine their studies with professional or other commitments. Any extension beyond the standard duration of the programme requires prior approval from the Head of degree programm. Requests for an extension must be submitted in writing by email to mse@bfh.ch.
Mode of study	- The full-time programme comprises a study workload of up to 30 ECTS credits per semester. - For part-time study, a workload of approximately 15 ECTS credits per semester is recommended. Each theory/core module comprises 3 ECTS credits. Three of these modules (2 TSM and 1 FTP) are compulsory and are recorded in the ISV. The three compulsory modules are selected from the recommended modules of the study profile with priority 1.
Central Modules (Basic training)	Provided the minimum requirements for each module group are met, the final central module can be selected from one of the three groups to achieve the required total. TSM Technical scientific modules At least four TSM modules (AHB & TI: 12 ECTS credits) Of these, 2 modules are compulsory modules and are stated in the IS-A FTP Fundamental theoretical principles modules At least three modules (AHB & TI 9 ECTS credits) Of these, 1 module is a compulsory module and is stated in the IS-A CM Context modules CM At least two modules (AHB & TI: 6 ECTS credits)
EVA's	Complementary modules (EVA's Home Moodle MSE (mseengineering.ch)) provide the opportunity to acquire in-depth knowledge that cannot be covered in the basic training modules due to the high degree of specialization. As a rule, project work worth less than 6 ECTS or 9 ECTS is not permitted. Exceptions, for example to replace an EVA, must be approved by the head of degree programm.
Projects	TI: Project work (PA1) with 9 ECTS / Project work (PA2) with 15 ECTS AHB: Project work (PA) with 6 or 9 ECTS: Project work (PA) with 12 or 15 ECTS
Master-Thesis	The master's thesis (MTh) is credited with 30 ECTS credits (AHB & TI)

6 MSE-CH: Central modules

Core modules or central modules are the basic training with 30 ECTS credits. The framework timetable is usually valid for 4 years, which makes it easier to plan the studies. The choice of modules is made individually and based on the student's specialization (profile) and individual need in consultation with the advisor. Each theory module comprises 3 ECTS credits. Together with the Advisor, the Student determines which two (2) technical scientific (TSM) modules and which one (1) fundamental theoretical principle (FTP) module should be considered core electives (compulsory). These 3 modules must be figured on the list of recommendations (Priority I) of the respective profile.

Module description	Master of science in engineering - MSEngineering / FAQ
Dates Academic Year	The weeks in which the MSE examinations take place can be found here: Home Moodle MSE (mseengineering.ch) / Examination schedule Moodle MSE: Dates Academic Year Moodle MSE
Fact & Figures	16 profiles, 151 theory modules on offer, 1700 enrolled students in AY25-26, 5101 diplomas issued until end 2025
MSE Moodle	General Information
WLAN	WLAN-Access_Eduroam_v5 (6).pdf If the problem cannot be solved with the factsheet and the specified measures, please contact servicedesk@bfh.ch
Self-Assessment	Test Access Factsheet: / Self-assessment-tests Students can only take the test when REL (released) appear.
Flipped Classroom	Flipped Classroom modules starting in AY24-25, lectures can choose whether to stream or not. This condition may affect the student's module choice. You find the indication about joining flipped classroom or not in the timetable on Moodle.
Different Region	Registering for core modules in multiple regions within the same semester is not recommended unless exam dates are on different days and travel between locations is feasible. The registration dates for the central module have been coordinated with eight universities of applied sciences. For this reason, registrations will be processed simultaneously at specific times. • We recommend that our BFH students register as early as possible, as places are allocated according to priority, study profile and time of registration. • If a registration is rejected at an early stage, this is usually because the module is not a priority in the study profile. It is therefore necessary to look for an alternative module and register for it during the next registration phase. (However, it is also possible to register for the same module again; in this case, always state the date of the first registration in Excel -Region D). • There is a delay between students' enrolments and the entries being made in IS-A, as we first await confirmation from MSE-CH before making the entries in IS-A. • Before a new registration or withdrawal is submitted in a different registration phase, the entries in IS-A must first be checked. • If students realize within the first two weeks (10 or 40) that they will not be sitting the exam, they must officially withdraw by emailing.
Registration Step 1	

Registration Step 2 on MSE CH Moodle	Access to classes: Each module has a dedicated 'course section' on the MSE Moodle, which contains all relevant information (teaching materials, resources, streaming details, etc.). Access to these course sections is only granted shortly before the start of the semester. • Students can access their module courses using the password provided in the module factsheet. • Registering on Moodle does not constitute official enrolment in a module. • If students are no longer enrolled in a module (see IS-A), we recommend that they also withdraw from the corresponding Moodle course.
Passive Streaming	Reg-D: Passive streaming is mandatory for all TSM and FTP modules except Flipped Classroom (FC). FC modules are in the timetable Reg-F & Reg-I: Not mandatory, the lectures can decide whether they want to stream or not.
Redesign Timetable	The MSE timetable of central modules is always valid for four years, after which it is redesigned. AY24-25: Only one of these modules can be chosen; FTP AppStatA or FTP PredModA (timetable 59* and 95*) / TSM_AnSeqDa remains an offer Region F / TSM_DeLearn Becomes FTP module. Next Redesign AY28-29
Viewings	There will be some changes for the new academic year. We will provide further information as soon as possible.
Exams & Resits	Students must notify the MSE Office if they are unable to attend an exam or a resit. Enrollment in a module automatically includes enrollment in the module's final exam. If a student does not take the exam (a no-show), the module will be recorded with a score of 1.0. Students are not permitted to resit the exam if they did not take the ordinary final exam at all. Only two attempts are allowed to pass each module. All exams must be taken in person at one of the following locations: Region D, Lausanne or Lugano. Remote participation is not permitted. If a medical certificate is provided, the repetition will be counted as the first attempt. If an examination (compulsory modules) needs to be repeated due to illness, this is generally only possible in a different semester, and registration must be completed in the usual manner by the deadline. It is recommended to attend the module in full, as the content may change from semester to semester. Only the compulsory modules must be passed after the second attempt at the latest (see ISV). Other modules do not necessarily need to be retaken unless the student does not want to have unsatisfactory grades listed on their diploma (ToR). If there are other reasons preventing a student from taking an exam (regular or resit), the head of the degree programme can decide what the next steps are in accordance with the study regulations. You can send your request to mse(at)bfh.ch.
Resits second attempt in the same semester	Only students who didn't pass their first attempt in the regular exam session can register for the resit exams. It counts as the second attempt and therefore it will be the last possibility to pass the module. In general, resits will take place on the same day of the week as the original class. Where possible, they will also take place in the morning or afternoon as per the timetable. However, they will start at 9:15 a.m. or 2:15 p.m. Students will be given individual times for oral resits. (The resits registrations are not entered in IS-A).

or second attempt
in a different
semester

The second option is to take the exam in a different semester, but only if the resit was not taken. It is recommended to take the module again in its entirety, as the content may change from semester to semester.

7 Region D: Central modules

Most of the central modules are organized by Reg-D.

MSE moodle	General Information / Moodle MSE: Timetables all regions Moodle MSE
IS-A	There is a delay between students' enrolments and the entries being made in IS-A, as we first await confirmation from MSE-CH before making the entries in IS-A. Before a new registration or withdrawal is submitted in a different registration phase, the entries in IS-A must first be checked.
Venues	You find details about the teaching venues in the timetable and general information regarding ' locations ' on Moodle. • Zurich: PHZH, HWZ and ZHAW at Lagerstrasse; FHGR at Limmatstrasse 21 • Winterthur: ZHAW MT Technopark Trakt A, Technoparkstrasse 2, Winterthur
Infrastructure	Printing is not possible at the Zurich site. WLAN is available via "eduroam" in all MSE venues, instructions ' here '
Registrations phases	In Region D, there are several registration phases that apply to all students of the eight Universities of Applied Sciences. This system ensures that students who are admitted later still have the opportunity to register for modules. During the different registration phases, it is also possible to change module registrations or choose alternative modules if a module is already full. It is important to respect the communicated registration deadlines for each phase and to check your registrations in IS-A after some time to make sure everything is correct (see Deadlines).
Module Registrations	We need the excel for the registrations of central modules in Region D. Before submitting a new module registration or deregistration always by excel, the entries in IS-A must be checked. Please note there is a time lag between student registrations and entries in IS-A.
CM modules	All CM modules will be 100% online, synchronous. Access links to the online lessons will be published in the respective Moodle course of the module. But the exams take place on site.
FTP / TSM	FTP and TSM modules: • On-site teaching (MK recommends students to be on-site), additionally • passive streaming, mandatory for all TSM and FTP modules, except Flipped Classroom modules, they might stream or not, info in timetable for semester. To obtain the optimal learning outcome and the best preparation for the exams, it is strongly recommended to join the class on-site and use passive streaming only as a fallback solution.

8 Region F & I: Central modules

Moodle MSE	General Information
Registration	Students register for a module by sending an email to the MSE office, mse(at)bfh.ch
Timetable	The timetable for AY 26_27 is ready by the end of May.
Teaching	FTP and TSM module: • On-site teaching

- Possible streaming (students must ask lecturers, they can decide freely).

CM module:

- 100% online, synchronous
- However, the CM exam also takes place on site. (Exams usually take place during the day and not on the same day as the module is taught.)

9 EVAs & Summer school / CAS (AHB Profile CE)

The modules are offered by BFH UAS collaborating with the MSE universities and are conducted as courses, seminars and/or conferences. There are courses from 1 to 3 ECTS credits, in general

Weekday	EVAs are often held on Fridays.
Planning & Registration	It is best to plan the EVAs with your advisor when planning your studies. In principle, they must agree to your attendance at the desired EVA. You can register via Home Moodle MSE (mseengineering.ch) EVA: Complementary Modules AY25-26 (log in first) Moodle MSE Moodle MSE EVA: Complementary Modules AY26-27 (log in first) Moodle MSE Moodle MSE
Registration	Please see the chapter "Deadlines". We accept registrations as described in this chapter.
Summer school	Summer schools recommended by the BFH are usually communicated to students by e-mail through the MSE office. The head of degree programm will then review the applications and give their approval.
Grade	If an EVA, CAS or Summer School is attended at another UAS or another BFH department. BFH students are responsible for obtaining the grade and report it to the MSE office within 2 weeks of the end of the course. CAS modules may be attended only if no equivalent courses (EVA) are available within the MSE Program. Students and advisors check whether an equivalent EVA has been published.
CAS (only CE-Profile)	• The student clarifies whether the advisor agrees on the desired CAS module(s). • If approved, the advisor is then responsible for determining the form of the examination form. He/she informs the student, the MSE office with cc to the head of the degree program and the PCO about the examination form, its requirements and scheduled date(s). • Important: The participation in CAS modules as MSE courses allows the recognition of ECTS credits for the MSE program. Therefore, no credit can be counted towards the obtention of a Certificate of Advanced Studies. Consequently, the student cannot take the examination foreseen by the CAS und must take an ad-hoc examination. This examination is defined by the MSE advisor and consists usually of a written part (e.g. project report, learning diary, etc.) and an oral presentation (requirements to be adjusted in regards of the number of credits targeted). • The student carries out CAS registration following the continuing education program procedure. • As soon as participation is confirmed, the student emails their advisor and the MSE Office about the start and end dates of the selected CAS. When the relevant modules of the CAS are completed (max. 9 ECTS are recognized in the MSE), the student proactively informs the MMSE office and their advisor. The CAS office will also inform the MSE office about the successful attendance and confirm the completion of the selected modules.

The MSE office will credit the defined ECTS points in the student's ToR when the following requirements are fulfilled:

1. upon receipt of the confirmation from the CAS secretariat and
2. after receiving the completed examination and a copy of the examination protocol from the advisor.

10 Project work & master's thesis

The project work and the master's thesis are registered by e-mail so that they can be entered in IS-A on time. We expect a proposal for all projects. See deadlines!

Registration projects and MTh	PAs and MTh are MSE-Modules which must be attended within a study semester. Module registration for PAs and MTh must be completed by email within the registration deadlines. If a student is taking the MTh module over two semesters, please note that we can only enter them once in IS-A. This means that there may be no module entry for the final semester.
Proposal	The proposal is a document for project work and master's theses that sets out the agreements between the student and the advisor. In the MSE program, the advisor determines the topics in consultation with the student. Projects can be cumulative. They must each contain a research component. ➤ The proposal is usually written by the advisor and submitted by the advisor or the student to the MSE office. Only in MTh is an external expert involved. The master's thesis is credited with 30 ECTS credit: To begin the master's thesis (MTh), all three compulsory modules outlined in your ISV must be completed, along with, in general, all core modules totaling 30 ECTS, the EVA modules, and the project modules. • There are some exceptions to this rule. You may start the MTh with 27 ECTS in core modules —meaning one core module of 3 ECTS to be completed throughout the upcoming term— if the MTh is completed over one semester. • Alternatively, if the MTh spans two semesters, you can begin with 24 ECTS, leaving two core modules of 3 ECTS each to be completed until the end of the MTh. • This flexibility allows for the possibility of attending overlapping modules later in your studies. • Note that the open modules must not be compulsory — modules stated in the ISV are considered compulsory. Exception: If a student fails a compulsory module on their first attempt but then takes the resit exam, they may still enroll in the MTh. However, this is at their own risk, as students will be excluded if they fail the module on their second and final attempt. Any other exceptions must be approved in advance by the MSE Program Director.
Begin of the MTh	
MTh expert	In accordance with the study regulations, an external person is called in as an expert for the MTh. Please read the corresponding factsheet for MTh experts carefully and take it into account for MTh.
Grade/Evaluation	Presenting the project work also provides practice for presenting the final thesis (MTh). This means that lecturers provide students with detailed feedback to help them with future presentations.

The MTh assessment is based on the SPR art 20. It must contain a significant proportion of scientific work, as defined by the supervisor. The criteria are divided into the following sub-areas:

Content criteria	• Work organization (Systematic approach, independence, organization, planning, commitment) • Problem solving (Creativity, correct and comprehensive presentation, mastery of the subject matter, quality of results) • Report (Legibility, completeness, design Quality of book abstract and short video) • Review (Presentation: Presentation of problem and solution, academic depth, Defense: Expertise, strength of argument)
Material costs	Only for the master's thesis, unless the project work is related to the MTh (see Template on BFH-Moodle)
Book	Each MTh includes a book abstract, which is recorded in the tool provided for this purpose.

11 Special Cases

If students or MSE staff have any questions, please do not hesitate to contact us. We would like to briefly highlight these points.

Illness & Exams	If students are unable to take an exam due to illness, we will need a doctor's note for the period of the exams as soon as possible. • When submitting the medical certificate always state which module/examination it applies to. • Students should also read the section on exam and resist (chapter 5)
Extension of the MTh deadline	If the MTh cannot be completed within one semester, we require an application by e-mail for an extension of the deadline, stating the reasons for the request.
No registration	Semester without module registrations: Students who are unable to attend a module in a term and write Proof of Competence must apply for a Leave of Absence within the deadline.
Tuition fees	Increase in tuition fees: FAQ BFH You can contact these foundations directly to find out what the requirements are for financial support.
Financial Support	• Hirschmann Stiftung • Stiftung Berner Fachhochschule • Bewerbung – Schweizerische Studienstiftung • Stiftung Fritz Bösch - Fundraiso • Schweizerische Studienstiftung – Neugier Motivation Verantwortung If these foundations do not provide support, as a last resort, the TI direction, direktion-ti@bfh.ch (TI students) can be asked about the possibility of financial support.

12 Tools

These administrative tools are essential for students and lecturers:

IS-A	IS-Academia: IS-A is BFH's student administration software. Webstudienangebot : Only the BSc modules with a timetable are represented in IS-A; the MSE modules are not. Students with a postgraduate qualification should be aware of this. All the necessary information for MSE modules (timetable and more) can be
-------------	---

	found on the MSE-CH Moodle page. The BSc modules are always booked in IS-A by the MSE Office based on the postgraduate agreement. Registration for the MSE modules is described in chapter 2.
Modules MSE	Here Home Moodle MSE you find the timetable and examination schedule for the core modules (MSE). Lecturers MSE-CH (central modules) store their scripts and teaching materials on this platform. To receive the course materials, students must log in with the password from the corresponding fact sheet.
Webseite MSE	Theoriemodule - MSEngineering
Moodle BFH	Information, MSE Guidelines for students, documents and news for MSE students Kurs: MSE BFH-TI Students BFH Moodle – Die Lernplattform der Berner Fachhochschule
Excel	Students submit all registrations (central modules) for Region D (Zurich) using Excel only. Students send only the current registrations and cancellations and keep their own Excel for the planning.
Switch Sign	We use Switch Sign Switch to sign official MSE documents.
Book	Each MTh includes a book abstract, which is recorded in the tool provided for this purpose.
Webuntis	For students with post-qualification / pre-master: As soon as the booking has been made in Bachelor modules, the course days and times are visible via this tool. Webstudienangebot

13 Legend

	<i>by email / by emailing to mse@bfh.ch</i>
Advisor	The Advisor is the personal academic advisor and supervises the project work and the MTh.
AUT	Autumn semester
Central modules	Basic modules, core modules: CM- FTP and TSM modules
Disadvantage compensation	Nachteilsausgleich
EVAs	Offer of supplementary modules at the eight universities of applied sciences in the MSE partnership / German: "Ergänzende Veranstaltungen (EVAs)"
